Fourth, how do we promote our product? We have 5 ways: Youtube Tiktok, Instagram, TV commercials, and websites. We will order a sponsor from a famous Korean Youtuber MIMIMU and will introduce our product. MIMIMU is popular from kids to adults, so we thought they had a big impact. For TikTok and Instagram, we make original videos and advertisements and get younger buyers. Some adults don't use Social Media, but they watch TV, so we advertise as commercials. We sell this product on websites, so we absolutely advertise on websites.

Compared to other products, why do we want to sell this product? Please compare it to normal wiping cloth. When we search for a wiping cloth on the Internet, the average price is 8,500 won. You will get wiping cloth and trouble of having to wipe your glasses by hand every time. However, our product is 8,000W, and you don't need to struggle with wiping glasses with just this price. So our product is more useful than other cleaners.
